

AST Club Members:

Meeting highlights for September 16th,

There were 53 members in attendance at the meeting, including 17 new members.

New Business

-Caterpillar presented information regarding opportunities within the company for internships, and full time positions. Be sure to visit them at the career fair next week.

-There will be more information regarding the CDL training this week. Be looking for an e-mail by the end of the week.

-The tentative date for Snow blower Service Days is November 8th. If you see any serious problems with this date, let a club officer know as soon as possible.

- We need members to fill roles in the fall committees. There are still spots available in the snow blower service days, and fall trip committees. This is a great way for younger members to get involved in the club, and meet some of the older members. It looks good on a resume, and gives you something to talk about in an interview. To volunteer, or get more information, talk to a club officer.

-There will be a John Deere information meeting September 22. The meeting will be in Black Engineering room 1028, at 7PM. Food will be provided. Be sure to mark your calendars.

-Be sure to “like” Agricultural Systems Technology Club on Facebook to stay in the loop with meetings, and events.

***The next meeting will be Tuesday
September 30th, in Elings room 0308 at**

7p.m. Pizza and pop will be provided as usual
